

CS4012 Lab 7

Material covered by this lab:

- HTML and HTML5
- **Homework:** You should complete the HTML and HTML5 tutorials on: <http://www.w3schools.com/html/default.asp> and https://www.w3schools.com/html/html5_intro.asp This may also be helpful when completing the lab.

Notes:

- This lab can be completed in either Linux or MS Windows.
- You can use any text editor you like (e.g. Notepad, Notepad++, Crimson Editor, Emacs etc.) for this.

Tasks:

- Create a simple web page in a text editor. Make sure that it contains all the tags listed below.
- View the page in a browser and experiment with modifying the HTML code and seeing what happens when you reload the page.
- Create a webpage with your name, interests, and hobbies. Use as many HTML elements as you can.
- Add comments to the HTML page and refresh the webpage.
- Try to list the HTML Tag Reference list below in your page. What does this tell you about printing HTML tags in the browser?

```
<!DOCTYPE html>
<head>
  <title>
  </title>
</head>
<body>
  <header></header>
  <article></article>
  <footer></footer>
</body>
</html>
```
